

SUKHIL K

Email-id : n.sukhil@gmail.com

Contact: +1 913 326 6680

Career Objective:

Affable and clever engineer with demonstrated abilities in teamwork and time management from voluntary and athletic endeavours. Participating in theatre activities helps to develop strong interpersonal skills as well as confidence and communication skills. knowledge of broad employability skills and the significance of teamwork, learning from others, and professional development.

EXPERIENCE

4.4 years of relevant experience in **Microsoft Azure Cloud Operations**.

Key Skills:

Azure IAAS
PowerShell
ARM Templates
Azure PAAS
Azure DevOps
Azure CLI
Azure AD

Roles and Responsibilities:

Project Name	Technical Support Specialist
Client	Diebold Nixdorf
Role	Cloud Engineer
Organization	Diebold Nixdorf
Duration	July 2021 – Dec 2021.
Tools	Azure Devops, AKS Testing, Azure KQL , Azure application Insights, Azure Log analytics workspace, Kubernetes, Azure workbooks/dashboard, Service bus, Azure Logic Apps, VNet and VPN Connection Monitoring, Infrastructure Monitoring, URL Monitoring, JIRA,GIT,BitBucket. Azure networking, Terraform
Environment (with skill versions)	Scripting Languages: Powershell, Az CLI, Json(ARM Templates), Azure DevOps. Azure : Log Analytics, Application insights, Workbooks/Dashboard, Azure SQL MI, Process automation.

Azure DevOps: Automated Continuous Integration builds, nightly builds, deployments and unit tests across multiple different environments (DEV, QA, Training, Production) each constituting different types of servers (DB, App, Web) and different number of servers of each type (for load balancing and such) using VSTS Build, Power Shell, and MS Deploy.

- Ownership for Azure SQL MI deployment.
- Created Build definition and Release definition for Continuous Integration and Continuous Deployment.
- Worked on CI/CD for VMSS and Log Analytics, app insights, Azure Runbooks.
- Created dashboards in VSTS for CI/CD pipelines, Work items and bugs.
- Resolved Merge Conflicts configured triggers and queued new builds within the release pipeline.
- Monitored and tracked deployments.

- Wrote PowerShell scripting for task automation and to schedule tasks.
- Created manual Test Cases to check that each of the deliverables meet users requirement.
- Managed new deployments and handled upgrades of clusters in Service Fabric to make sure the application is reliable.

Azure Service Bus for secure file transfer:

1. Use Service bus API to interact with messaging queue
2. Created multiple Queues and Service bus using Az Module and through ARM template
3. Used duplicate deletion, Dead letter and other features for effective use of service bus
4. Used Service bus explorer
5. Created Monitoring reports and alerts based on Service bus utilization.

Process Automation for Cloud 1.0:

- For cloud 1.0 as a DevOps engineer, I have automated the process of Deploying Virtual Machines (windows or Linux) as per the user's choice, add basic NSG rules, enable the Guest Level Monitoring, add the VM to desired log analytics workspace for monitoring and rendering records when needed, Deploy infra (CPU, Memory, free disk space, VM Heartbeat) alerts.
- **Deployment Simplification:** Have developed a script where a user can deploy
 1. Virtual Machine, add NSG rules.
 2. Enable Guest level monitoring as per the OS selected (Windows or Linux)
 3. Add VM to Log analytics workspace or create new if there is no existing resource
 4. Create Application Insights
 5. Create Logic App and schedule jobs using Logic Apps
 6. Deploy Azure Workbooks
 7. Infrastructure, URL Alerts and Monitor of Monitor Alerts using Custom Log search KQL.

Azure Backup and Site Recovery:

- Azure VMs replicating between Azure regions and On-premises. Replication Scenarios.
- Manage Site recovery for azure VMs.
- Enable/Disable Backup on azure VMs and restore VMs/disks from the backups.

Azure PAAS Deployments:

- Apart from our support scope, I have also learnt Azure PAAS deployments and issues related to it.
- Data warehousing
- Logic apps
- Log Analytics workspace
- Application Insights

Project Name	CSS Azure VM Platform Team
Client	Health Care Service Corporation
Role	Cloud Engineer
Organization	HCL Technologies
Duration	Oct 2017 – July 2021.
Tools	Host analyser, Xdash, Execution Graph, FC Shell, Availability Explorer, Jarvis and MS Solve, Guest Analyser, DiskSPD, FIO, Perfinsights, azure Devops.

Environment (with skill versions)	Scripting Languages: Powershell, CLI, Json, azure devops. Azure : Storage, Azure Portal, VM performance & Deployment, AZCOPY, Storage explorer
--	---

MICROSOFT AZURE (IAAS): Recruited to Support Microsoft Azure Cloud (IAAS) Platform. IAAS Platform team provides technical support to all the Azure Customers Globally. I am responsible to provide L2 technical support for IAAS VMs, Storage and Platform, AKS, AFS of Microsoft Azure if the case will be requested for an escalation.

Azure VM & VMSS Deployments:

- Issues related to Azure VM & VMSS deployments (failures) from Portal, PowerShell and CLI including general advisories.
- Troubleshooting Azure Storage and **VM performance** (CPU, Memory, Network) issues
- Azure VM resize issues (classic VMs and ARM VMs). Advisories and issues related to Availability sets.
- Use HUB licenses and relatable advisories. Converting existing VMs to HUB.
- **Adding Multiple NICS** to Azure Virtual Machine
- **Issues Regarding VM RDP**, sys log files missing, blue screen, black screen, VM under Generalized screen, VM under Bit locker screen.

Azure Kubernetes Service:

- Have a hand-on experience in Deployment of AKS and troubleshooting on any AKS cluster deployment failures.
- Worked and assisted customers on AKS cluster upgrades and all the possible issues during upgrade.
- Worked on troubleshooting the issues related to AKS cluster auto scale (scale up & scale down) and node failures. Configure Metrics for AKS using CLI and azure portal.

Azure Migration:

- Have an expertise on ASM to ARM migration.
- VM Across regions, VM across VNets.
- Azure Virtual machines across subscriptions (managed and unmanaged)
- Migration of VMs with plan information (Marketplace Images).
- Converting managed disk VMs to unmanaged disk and vice versa.

Azure Kubernetes and DOCKER Service:

- Have a hands-on experience in Deployment of AKS and troubleshooting on any AKS cluster deployment failures.
- Worked and assisted customers on AKS cluster upgrades and all the possible issues during upgrade.
- Worked on troubleshooting the issues related to AKS cluster auto scale (scale up & scale down) and node failures.
- Configure Metrics for AKS using CLI and azure portal.

Azure Resource Migration (via PowerShell & portal):

- Have an expertise on ASM to ARM migration
- VM Across regions, VM across VNets.
- Azure Virtual machines across subscriptions (managed and unmanaged)
- Converting managed disk VMs to unmanaged disk and vice versa.
- Migrating On-premises servers to azure (using VHD).

Azure Disk Encryption: Expertise on Azure VM disk encryption both Windows and Linux.

Azure file Sync: Create and use azure file sync services. Worked on issues related to azure file sync as: delay in file sync (files and folders not syncing up)

Training and Triages:

- Have trained the new members in the team on azure architecture.

- Troubleshooting on Azure VM performance issues and Virtual Machine scale sets over Skype calls.
-

Personal Attributes:

- Disciplined, Responsible, Industrious and Goal oriented having good Interpersonal skills and a Good Listener.
 - Can work under highly stressed conditions meeting deadlines.
 - Worked on IAAS platform and interested to learn SAAS, PAAS.
 - Overall relevant IT Experience of 4.4 Years.
 - Both independent and team worker, as required.
-

Academic Qualifications:

Kansas City, MO	University of Central Missouri	Spring 2022 – Fall 2023
• Master's in computer information system & information technology, GPA: 3.40/4.00.		
Hyderabad, TG	Sphoorthy Engineering College	May 2013 – May 2017
• Bachelors in Electronics & Communication Engineering, GPA: 6.8/10.
